Márcia Maurilio Souza

### **Introdução**

Este dicionário de imagem com foco no desenho e o Sistema Pictográfico Compic, foi organizado para favorecer a aprendizagem e a memória de vocabulário de alunos com Deficiência Múltipla Sensorial e pessoas com Surdocegueira Congênita com resíduo visual, visando a construção de conceitos e alfabetização.

Ele visa também favorecer o estilo de aprendizagem de alunos que utilizam o canal visual como fonte para aprendizagem, respeitando assim os princípios do Desenho Universal para Aprendizagem.

Os desenhos foram catalogados em ordem alfabética e as escolhas dos mesmos foram feitos a partir das diferentes atividades realizadas com os alunos da instituição que participam dos programas educacionais.

## SUMÁRIO

Introdução .....	04

Xícara .....	165
Zebra .....	166

## **Glossário**

### **COMPIC**

Compic é um recurso de comunicação criado e desenvolvido na Austrália. Não se baseia em ler a palavra escrita, ouvir ou falar uma palavra. Ao invés disso, é uma biblioteca de desenhos claros (contornos) e de fácil compreensão, chamados pictogramas, que contém informações de diferentes categorias (verbo, ações, pronomes e outros).

### **Deficiência Múltipla Sensorial**

São consideradas pessoas com deficiência múltipla sensorial-visual (MDVI), quando há a Deficiência Visual (baixa visão ou cegueira) associada a uma ou mais deficiências (intelectual, física/motora) ou a transtornos globais do desenvolvimento e distúrbios de comunicação e que necessita de programas que favoreçam o desenvolvimento das habilidades funcionais dessas pessoas, visando ao máximo de sua independência e uma comunicação eficiente. (MAIA et al, 2008, p.14).

São consideradas pessoas com deficiência múltipla sensorial-auditiva (MDHI) quando há deficiência auditiva/surdez associada à deficiência intelectual ou a deficiência físico-motora ou a ambas, ou a Transtornos Globais do Desenvolvimento. (MAIA et al, 2008, p.14).

## **Desenho Universal para Aprendizagem**

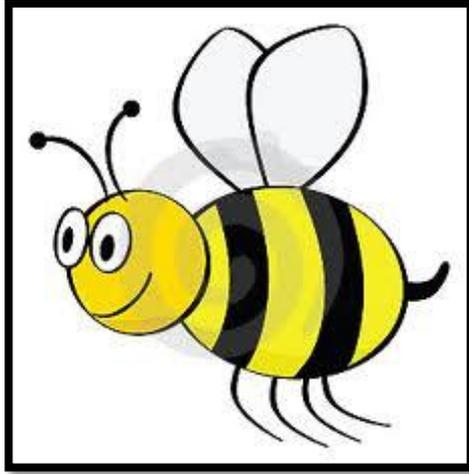

Os princípios do Desenho Universal na Aprendizagem (DUA) segundo Bove (2009) se baseiam na pesquisa do cérebro (neurociência e aprendizagem) e a mídia para ajudar educadores a atingir todos os alunos a partir da adoção de objetivos de aprendizagem adequados, escolhendo e desenvolvendo materiais e métodos eficientes, e desenvolvendo modelos corretos e específicos para avaliar o progresso dos alunos.

## **Estilo de Aprendizagem**

Estilos de Aprendizagem é um conceito importante não só para mudança de práticas educacionais e sim para apontar questões que irão ajudar o corpo docente e todo corpo administrativo da escola, instituições e outros, a pensar mais profundamente sobre o aluno.

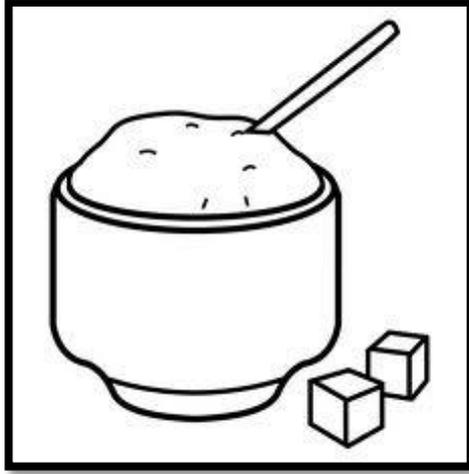

**Sistema Pictográfico:** As imagens tem semelhança com o objeto que representam. Ex.: a imagem da cadeira para se referir que quer a cadeira pra sentar, imagem da casa para se referir a casa.

**Surdocegueira Congênita** Ocorre quando uma pessoa nasce ou adquire a surdocegueira antes da aquisição de uma língua. Aqui no Brasil português e ou Libras. (Maia 2010).
