DICIONÁRIO DE IMAGENS

“DESENHO E LIBRAS”

Shirley Rodrigues Maia
Vula Maria Ikonomidis
Márcia Maurilio Souza

Introdução

Este dicionário de imagem com foco no desenho e o sinal de libras, foi organizado para favorecer a aprendizagem e a memória de vocabulário de alunos com Deficiência Múltipla Sensorial e pessoas com Surdocegueira Congênita com resíduo visual., visando construção de conceitos e alfabetização.

Ele visa também favorecer o estilo de aprendizagem de alunos que utilizam o canal visual como fonte para aprendizagem, respeitando assim os princípios do Desenho Universal para Aprendizagem.

Os desenhos foram catalogados em ordem alfabética e as escolhas dos mesmos foram feitos a partir das diferentes atividades realizadas com os alunos da instituição que participam dos programas educacionais.

Glossário

Deficiência Múltipla Sensorial

São consideradas pessoas com deficiência múltipla sensorial-visual (MDVI), quando há a Deficiência Visual (baixa visão ou cegueira) associada a uma ou mais deficiências (intelectual, física/motora) ou a transtornos globais do desenvolvimento e distúrbios de comunicação e que necessita de programas que favoreçam o desenvolvimento das habilidades funcionais dessas pessoas, visando ao máximo de sua independência e uma comunicação eficiente. (MAIA et al, 2008, p.14).

São consideradas pessoas com deficiência múltipla sensorial-auditiva (MDHI) quando há deficiência auditiva/surdez associada à deficiência intelectual ou a deficiência físico-motora ou a ambas, ou a Transtornos Globais do Desenvolvimento. (MAIA et al, 2008, p.14).

Desenho Universal para Aprendizagem

Os princípios do Desenho Universal na Aprendizagem (DUA) segundo Bove (2009) se baseiam na pesquisa do cérebro (neurociência e aprendizagem) e a mídia para ajudar educadores a atingir todos os alunos a partir da adoção de objetivos de aprendizagem adequados, escolhendo e desenvolvendo materiais e métodos eficientes, e desenvolvendo modelos corretos e específicos para avaliar o progresso dos alunos.

Estilo de Aprendizagem

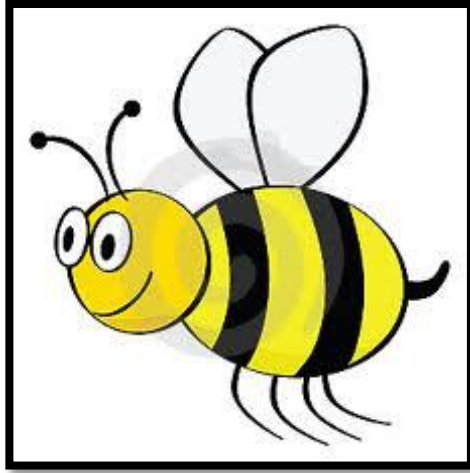

Estilos de Aprendizagem é um conceito importante não só para mudança de práticas educacionais e sim para apontar questões que irão ajudar o corpo docente e todo corpo administrativo da escola, instituições e outros a pensar mais profundamente sobre o aluno.

Surdocegueira Congênita

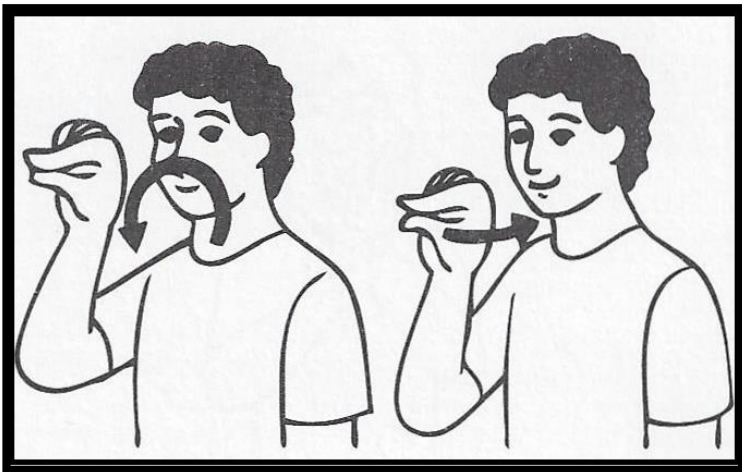

Ocorre quando uma pessoa nasce ou adquire a surdocegueira antes da aquisição de uma língua. Aqui no Brasil português e ou Libras. (Maia 2010).

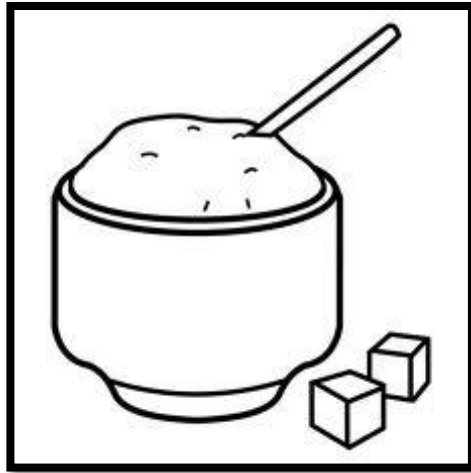

Libras

É uma língua de modalidade viso-espacial, com uma estrutura linguística distinta da língua portuguesa, a primeira língua das pessoas surdas. Cada país apresenta a sua língua de sinais. No Brasil denominamos de Língua Brasileira de Sinais – LIBRAS.
